SOLID WASTE MANAGEMENT PLAN

The Solid Waste Management Plan was updated according to the South Carolina Solid Waste Management Annual Report, Regulation 61-107.19, and current information and data.

PASSED AND ADOPTED this ___________ day of _________________, 2016, by the Pickens County Council by the following polled vote:

LIST OF APPENDICES

APPENDIX A - CODE OF (SOLID WASTE) ORDINANCES OF PICKENS COUNTY, SOUTH CAROLINA

APPENDIX B - LIST OF INDUSTRIES IN PICKENS COUNTY

*This Solid Waste Management Plan (Plan) was originally developed by BP Barber and Associates as approved by County Council on December 1, 2008. Any changes or modifications of the Plan were performed by Hulsey McCormick & Wallace at the requested of the Pickens County Solid Waste Department and serve as revisions to the original plan.
EXECUTIVE SUMMARY

PLAN DEVELOPMENT

Environmental concerns about landfilling prompted both the United States Environmental Protection Agency (herein the "EPA") and South Carolina's General Assembly to pass new regulations pertaining to the disposal of solid waste. On May 27, 1991, Governor Carroll Campbell signed the South Carolina Solid Waste Policy and Management Act of 1991 (herein the "Act") into law.

The initial Pickens County Solid Waste Management Plan included public participation through the composition of the local Solid Waste Advisory Council (SWAC) which was formed in January 1993. The SWAC included representatives from all areas of the County, including municipalities as well as unincorporated and rural areas. Representatives from local government, industry, small business, agriculture, education systems, recyclers and environmental groups were included on the Council. The meetings of the SWAC were advertised and open to the public. The initial plan was submitted to the South Carolina Department of Health and Environmental Control ("SC DHEC") in November of 1993. By action of County Council and as allowed by the Act, the SWAC was not retained for future input once the initial plan was implemented. This and future revisions to the Pickens County Solid Waste Management Plan shall provide opportunity for public input.

In May 2015, the South Carolina General Assembly amended the Solid Waste Policy and Management Act of 1991. SCDHEC revised the South Carolina Solid Waste Management Plan. The Pickens County Solid Waste Management Plan Update ("Plan"), was prepared to be consistent with recent court decisions, regulation revisions and other changes to solid waste management. The Plan covers a planning period from Fiscal Years 2016 through 2035.

Data and information included in this Plan was compiled from SCDHEC, the Pickens County Solid Waste Management Plan dated January 7 2013, Pickens County, and the South Carolina Revenue and Fiscal Affairs Office.
PLAN UPDATE

As outlined in the Act, the Plan must be reviewed and updated as needed to include changes that are deemed necessary at the time. As technologies change, as regulations change, as interpretations of existing laws are clarified by the Courts and as specific solid waste management needs of the County change, updates to the Plan will be made. This revision, prepared by Hulsey McCormick & Wallace (HMW), dated March 4, 2016, updates the County policy and provides current information and data as of Fiscal Year 2014.

ANNUAL PROGRESS REPORTS

Annual Progress Reports are required by the Act for each fiscal year (July 1 - June 30) and are due to SCDHEC by October 1 of each year. An Annual Progress Report will be prepared by the County and submitted to SCDHEC each year. All solid waste management facilities located in Pickens County must submit an Annual Report for their facility to SCDHEC. All this information must be collected and analyzed to plot a prudent strategy for managing the County's solid waste in the future.
I. LEGISLATIVE AUTHORITY

FEDERAL AND STATE AUTHORITY

The primary federal law relating to solid waste management is the Resource Conservation and Recovery Act (RCRA) of 1976, established by the EPA. The first section of this law, Subtitle C (Hazardous Waste), established a national regulatory program to control the management of hazardous wastes. South Carolina received authorization from the EPA to initiate these activities in 1985. The second section of RCRA is Subtitle D (Solid Waste), which was published in the Federal Register on October 9, 1991. This section established a framework for federal, state, and local government cooperation in solid waste management. As a result of this law, the federal government provides minimum national standards for protecting human health and the environment and technical assistance to states for planning and implementing their own solid waste management policies.

The principal law that governs solid waste management within the State of South Carolina is the Solid Waste Policy and Management Act of 1991 (Amended May 12, 2015). This Act authorized SCDHEC to enforce the appropriate federal and state standards. Regulations are in place for the management of Construction, Demolition, and Land-Clearing Debris (C&D), Industrial Solid Waste, Municipal Solid Waste (MSW), Waste Processing, Waste Tires, Waste Oil, Solid Waste Transfer Stations, etc.

Section 44-96-80(J) of the Act gives the governing body of each county the responsibility and authority to provide for the management of solid waste within the county. Section 44-96-80(K) authorizes each county to enact ordinances that may be necessary to carry out its responsibilities.

EXISTING ORDINANCES

Pickens County was established as a home rule county in 1975 pursuant to the South Carolina Home Rule Act. It is governed by a six-member County Council. The County is authorized through Solid Waste Policy and Management Act of 1991, Section 44-96-80, to develop, promulgate, and enforce regulations and procedures for the management of solid waste and operation of solid waste facilities. The County Council, through Pickens County Ordinance Chapter 34, authorizes Pickens County Solid Waste Department to develop, promulgate, and enforce these regulations and procedures. The ordinance went into effect on July 13, 1999. Appendix A contains a copy of the current Pickens County Solid Waste Ordinance. Violation of any part of the Ordinance is a misdemeanor.

POLICIES

It is the policy of Pickens County to operate its solid waste management in an efficient and economical manner while protecting human health and the environment. It is also the policy of the County to recycle as much waste as is practical.
It is preferable to promote the reuse and recycling of materials rather than the treatment, storage or disposal of wastes. Methods of solid waste management shall protect public health, safety and the environment by employing the best available technology economically feasible for pollution control.

**Organization Structure**

The Pickens County Council is the governing body responsible for solid waste management planning within the County. The Solid Waste Manager, under the general supervision of the County Administrator, oversees the daily management of the solid waste program. The following representatives have authority over solid waste management within Pickens County:

**Mr. Tom Hendricks**  
Pickens County Administrator (Interim)  
222 McDaniel Avenue, B-2  
Pickens, SC 29671  
Telephone: (864) 898-5844

**Mr. Gerald Wilson**  
Director  
Pickens County Public Works Department  
186 Prison Camp Road  
Pickens, SC 29671  
Phone: (864) 898-5933

**Ms. Louise Ponder**  
Solid Waste Director  
Pickens County Public Works Department  
2043 Old Liberty Hwy  
Pickens, SC 29671  
Phone: (864) 859-3492
II. DEMOGRAPHICS

POPULATION TRENDS

Pickens County is located in the northwestern corner of South Carolina (Exhibit A). Seven (7) municipalities are located wholly or partially within Pickens County: the Cities of Central, Clemson, Easley, Pickens and Liberty and the Towns of Norris and Six Mile. Table 1 illustrates the approximate population of Pickens County from 2000 to 2015, including the percent change over the period.

Table 1 – Pickens County Population Trend (2000-2015)

% Change 9%

The "Population Projections" prepared by the South Carolina Revenue and Fiscal Affairs Office, predicts over the next twenty (20) years, Pickens County will experience an approximately 11.3% increase in population, and should experience a similar increase in its solid waste generation. Table 2 illustrates the projected population over a twenty (20) year period (2016-2035) for the County. Projected waste stream generation numbers will be presented in Section IV of this Plan.

ECONOMIC TRENDS

The characteristics of a local economy are significant indicators of growth. Changes in the economic base will directly affect solid waste management within Pickens County and must be an integral part of solid waste planning. The availability and type of employment impacts the demand for housing, retail trade, and services.

Industry and business in Pickens County are crucial factors in solid waste planning. As the number of industries and businesses in the County increases, the amount of waste generated within the County also likely increases. During 1990’s and early 2000’s, the County experienced significant economic growth. However, the downturn in the national and local economy beginning in 2008 curtailed that growth. Expectations are that low to moderate growth will resume as the regional economy rebounds. The Pickens County Commerce Park near the town of Liberty has attracted
several industries and plans to expand even more in the coming years.

LAND DESCRIPTION

Land use is another important characteristic to be evaluated in the development and implementation of a solid waste management system because it indicates areas of growth and urban development, both of which result in increased waste generation. In addition, areas of concentrated growth can cause congestion, which could adversely affect the collection and transportation of solid waste.

Pickens County encompasses approximately 497 square miles and has a population density of approximately 241 people per square mile, according to the population stated in the South Carolina Solid Waste Management Annual Report for FY 2014.

Pickens County is located in the northwestern corner of South Carolina, minutes from I-85, and is part of the Greenville-Spartanburg Metropolitan Statistical Area. The City of Pickens serves as the County seat and is located approximately 20 miles west of the region’s largest city, Greenville.

As residential, commercial, and industrial development continues in the County, additional solid waste collection locations will be evaluated to accommodate the increase in waste generation. In addition, as traffic in Pickens County increases, the traffic patterns for solid waste transport should also be evaluated.

TOURISM

The tourism economy in South Carolina generates enormous income and enormous solid waste concerns. Pickens County offers several features for culture and recreation that attract its share of the tourists. The County has become a haven for those who love the higher elevations and cooler climate.

The tourist population will have a significant effect on a community’s solid waste management program. Pickens County must be aware and plan for the impact to its program.
III. EXISTING SOLID WASTE MANAGEMENT

GENERATION AND CHARACTERIZATION

The Act requires that all solid waste facilities conduct accurate record keeping of waste stream data as shown in Table 3 below. Class Three Waste and Municipal Solid Waste (MSW) may be used interchangeably throughout this Plan. Counties must submit Annual Progress Reports to SCDHEC as required by the Act. The following amounts and types of wastes were generated for disposal in Pickens County and were disposed of in various landfills during the 2014 fiscal year according to the 2014 South Carolina Solid Waste Management Annual Report:

COLLECTION, TEMPORARY STORAGE, AND TRANSPORTATION OF SOLID WASTE

Residential curbside collection of MSW and yard waste is available to residents of Pickens County within a municipality or the franchise area. In addition to MSW and yard waste, collection of recyclables is also available to the residents of the County. Recyclables accepted from the curbside collection include aluminum and steel cans, glass bottles and jars, plastic bottles and jugs, and paper.

**Pickens County Solid Waste Recycling Coordinator**

Mr. Jason Anders, Recycling Coordinator  
Pickens County Public Works Department  
2047 Old Liberty Road  
Liberty, SC 29657  
Phone: (864) 850-7092

Pickens County owns and operates eight (8) drop off sites (Exhibit B) listed in Table 4 below. Materials collected at each site are: aluminum and steel cans, plastic bottles and jugs, antifreeze, batteries, paper, glass bottles and jars, cardboard, oil bottles/filters, tires and clothing.

### SOLID WASTE TRANSFER STATIONS

Solid waste transfer stations are combinations of structures, machinery, or devices at a place or facility where solid waste is taken from collection vehicles and placed in other transport vehicles for movement to another solid waste management facility. One (1) solid waste transfer station, the Pickens County Transfer Station (Facility ID #: 391001 6001) is located in Pickens County (Exhibit B). The facility is permitted to accept 400 tons per day of Class Three waste which is about twice the amount generated in the county. For more information about this transfer station contact:

**Pickens County Transfer Station**

Mr. Gerald Wilson, Director  
Pickens County Public Works Department  
186 Prison Camp Road  
Pickens, SC 29671  
Phone: (864) 898-5933
SOLID WASTE PROCESSING FACILITIES

A solid waste processing facility is any combination of structures, machinery, or devices utilized to reduce or alter the volume, chemical, or physical characteristics of solid waste through processes such as baling or shredding, prior to delivery of such waste to a recycling or resource recovery facility, or to a solid waste treatment, storage, or disposal facility, and excludes collection vehicles. A County-owned and operated bailing facility is located at 2043 Old Liberty Road, Liberty, South Carolina for recycled goods.

CLASS THREE LANDFILLS (MUNICIPAL, INDUSTRIAL, SLUDGE, INCINERATOR ASH)

A Class Three Landfill is one designed to receive wastes such as household waste, sludge, incinerator ash and certain industrial waste, but is not a land application unit, surface impoundment, injection well, or waste pile. There are no operating Class Three Landfills in Pickens County.

CLASS TWO LANDFILL (CONSTRUCTION, DEMOLITION, AND LAND-CLEARING DEBRIS LANDFILLS & CERTAIN INDUSTRIAL LANDFILLS)

Class Two Landfills are designed to accept various inert wastes such as Construction, Demolition, and Land-Clearing Debris (C&D), similar industrial wastes. Class Two Landfills in Pickens County are only allowed to receive for disposal “Acceptable Wastes” listed in Appendix I of South Carolina Regulation 61-107.19. Currently one (1) active Class Two Landfill is located in Pickens County. One additional Class Two Landfill is permitted but not completed and received no waste in FY14.

The Easley Class Two Landfill (Facility ID No. 391001-1201), is a county owned facility located within Pickens County (Exhibit C). The Easley Class Two Landfill is an active landfill, estimated to have 3.7 years of remaining life. The facility is permitted to take 20,000 tons of waste each year, but received 15,512 tons in FY2014. For more information regarding the Easley Class Two Landfill contact:

**Easley Class Two Landfill**

Mr. Gerald Wilson, Director  
Pickens County Public Works Department  
186 Prison Camp Road  
Pickens, SC 29671  
Phone: (864) 898-5933

The Highway 93 Landfill is currently permitted by SC DHEC for 70,500 tons of waste per year. The privately-owned landfill has not been completed (as of March 2016) and did not receive any waste in FY14. According to Class Two Landfill Permit No. LF2-00003 effective 2008, the Highway 93 Class Two Landfill is only permitted to receive for disposal “Acceptable Wastes” listed in Appendix I of South Carolina Regulation 61-107.19.
CLASS ONE LANDFILLS (LAND-CLEARING DEBRIS AND YARD WASTE)

Approvals to operate landfills for land-clearing debris and yard waste are issued by SCDHEC under an existing statewide general permit for landfills used solely for the disposal of trees, stumps, wood chips, and yard waste generated from land clearing activities. Two (2) Class One Landfills that were permitted during FY14 are located within Pickens County.

The Pine Grove Church Road Landfill (Facility ID No. 392738-1701) is located within Pickens County (Exhibit D). This LCD Landfill had an annual tonnage limit of 3,000 tons; the facility took in 267 tons in FY14. The landfill has been closed and the permit is no longer active. For more information regarding the Pine Grove Church Road Landfill contact:

Pine Grove Church Road Landfill
Mr. Donny Hughes
PO Box 1767
Easley, South Carolina 29641
Phone: (864) 855-1559

The Walter Moody LCD Landfill (Facility ID No. 392775-1701) is located within Pickens County (Exhibit D). This LCD Landfill received approval to operate in 2007 with an annual tonnage limit of 625 tons. The facility took in 0 tons in FY14 and the landfill closed in 2015. For more information regarding the Walter Moody LCD Landfill contact:

Walter Moody LCD Landfill
Mr. Walter Moody
918 Five Forks Road
Liberty, South Carolina 29657
Phone: (864) 442-3295
SHORT TERM STRUCTURAL FILL

A short term structural fill is a very restricted temporary activity whereby hardened concrete, hardened asphaltic concrete, bricks, masonry blocks and land-clearing debris may, under a permit-by-rule, be disposed of in an area of one (1) acre or less for a period not to exceed twelve (12) months. Such sites must be registered and approved by SCDHEC, but do not have to be consistent with this Plan.

SOLID WASTE INCINERATORS

A solid waste incinerator is any engineered device used in the process of controlled combustion of waste for the purpose of reducing the volume, and/or reducing or removing the hazardous potential of the waste charged by destroying combustible matter, leaving the noncombustible ashes, material, and/or residue.

The Pickens County Air Curtain Destructor (Facility ID No. 391001-4001) is located within Pickens County (Exhibit E) and operated by the County. For more information regarding the Pickens County Air Curtain Destructor contact:

Pickens County Air Curtain Destructor
Mr. Gerald Wilson, Director
Pickens County Public Works Department
186 Prison Camp Road
Pickens, SC 29671
Phone: (864) 898-5933

COMPOSTING AND WOOD CHIPPING/SHREDDING FACILITIES

Composting facilities are utilized to provide aerobic, thermophilic decomposition of the solid organic constituents of solid waste to produce stable, humus like material. One (1) composting facilities are located in Pickens County (Exhibit E).

The City of Clemson Brush Recycling Center (Facility ID No. 391002-3001) is located within Pickens County. For more information regarding the City of Clemson Brush Recycling Center contact:

The City of Clemson Brush Recycling Center
Mr. David Conner
PO Box 1566
Clemson, South Carolina 29633
Phone: (864) 653-2053
USED OIL COLLECTION AND PROCESSING FACILITIES

Used oil, oil filters, and oil bottles generated by residents of Pickens County are collected at each of the County's convenience centers, all listed in Table 4 on page 10.

The used oil is recycled as a feedstock at Pickens County's biodiesel production facility. Biodiesel fuel is utilized in the County equipment and vehicles. Waste oil not utilized for biodiesel production is given to Santee Cooper. Santee Cooper’s Give Oil for Energy Recovery (GOFER) program collects the used oil. The used oil is transported to Santee Cooper’s Jefferies Generating Station where the recycled oil is used for fuel to generate electricity.

No commercial collection or processing facilities for used oil are located in the County at this time.

WASTE TIRE HAULERS, COLLECTION FACILITIES, PROCESSING FACILITIES, AND DISPOSAL FACILITIES

Pickens collects waste tires at its convenience centers. The Pickens County Recycling Department waste tire processing facility (Facility ID No. 3910001-5201) shreds some of the waste tires generated in the County. The tire chips are sold to Holcombe Septic for use in septic drain field lines. The County also contracts with haulers to transport the tires to a waste tire recycling facility. For more information, contact:

**Pickens County Recycling Department**

Mr. Gerald Wilson, Director
Pickens County Public Works Department
186 Prison Camp Road
Pickens, SC 29671
Phone: (864) 898-5933

RESEARCH, DEVELOPMENT, AND DEMONSTRATION (RD&D) PERMITS

Research, Development, and Demonstration (RD&D) Permits are issued for innovative and experimental solid waste management technologies and processes. No research, development, and demonstration permits have been issued for any solid waste facilities within Pickens County.

LAND APPLICATION OF SOLID WASTE PERMITS

Permits for the land application of solid waste establishes appropriate application rates, frequency of application, and monitoring requirements for the uniform surface spreading or mechanical incorporation of nonhazardous solid waste on or into soil that is being used for agricultural, silvicultural, and horticultural production. Land application of solid waste is a way to recycle South Carolina's resources and is not a means of waste disposal. No land application permits have been
issued for any facility within Pickens County.

RECYCLING PROGRAMS

Pickens currently operates eight (8) recycling drop off convenience centers, listed in Table 4, on page 10. Pickens County relies primarily on curbside collection and these drop off/convenience centers for collection of recyclables within the County.

SPECIAL WASTES

Special Waste is defined as commercial or nonresidential solid waste, other than regulated hazardous wastes, that are either difficult or dangerous to handle and require unusual management at MSW landfills, including but not limited to pesticide wastes, liquid wastes, sludge, industrial process wastes, wastes from pollution control processes, residue or debris from chemical cleanups, contaminated soil from a chemical cleanup, containers and drums, animal carcasses, coal ash or coal combustion residuals. Special Waste is not permitted for disposal at any of the public or private solid waste disposal facilities located in Pickens County.

Household Hazardous Material (HHM)

Household Hazardous Material (HHM) is defined as material found around the home, usually in small amounts, which can harm people or the environment. Examples of household hazardous materials include paint, pesticides, cleaning supplies and batteries. Household hazardous materials are not regulated as hazardous materials by South Carolina law but are considered part of the MSW stream. Pickens County does not currently collect HHM separately from the MSW stream. Therefore, these materials will be collected and transported to a receiving MSW Landfill located outside the County for disposal.

IMPORT AND EXPORT OF WASTE

The County has no specific policy on the movement of waste within the County. The County specifically prohibits the import of Special Wastes into the County. There are no controls over the export of waste to areas outside of the County.

SOLID WASTE MANAGEMENT FUNDING

Pickens currently receives solid waste management funding through tax revenues from the County’s General Fund. Revenues from tipping fees, recycled materials sales and other receipts are returned to the County’s General Fund. These sources of revenue have shown to be sufficient to fund all solid waste management operations for Pickens County.
IV. FUTURE SOLID WASTE MANAGEMENT

WASTE STREAM PROJECTIONS

1. Class Three Waste (Municipal, Industrial, Sludge, Incinerator Ash)

According to the 2014 South Carolina Solid Waste Management Annual Report, the amount of waste generated within Pickens County for disposal in Class Three (MSW) landfills was 76,695 tons, giving a generation rate of 3.51 pounds per day (ppd). Class Three waste generation projections for the coming years are shown in Table 5 based on the 2014 generation rate and the projected population (See also Table 2, Page 7).

</tbody>
</table>

Tons = ppd × 365 × population ÷ 2,000
2. **Class Two Waste (Construction, Demolition, and Land Clearing and Industrial)**

According to the 2014 South Carolina Solid Waste Annual Report 15,512 tons of Pickens County Class Two waste was disposed of in Class Two landfills located in Pickens County and the adjacent counties.

A Class Two waste generation rate of 0.78 pounds per person per day was calculated based upon the estimated 2014 Pickens County population. Table 5 above, depicts the Class Two waste projections for Pickens County over the next twenty (20) years, based upon the current waste generation rate and population projections.

3. **Class One Waste (Land Clearing Debris and Yard Trash)**

According to the 2014 South Carolina Solid Waste Annual Report 567 tons of Pickens County Class One waste was disposed of in Class One landfills located in Pickens County and the adjacent counties.

A Class One waste generation rate of 0.03 pounds per person per day was calculated based upon the estimated 2014 Pickens County population. Table 5 above, depicts the Class One waste projections for Pickens County over the next twenty (20) years, based upon the current waste generation rate and population projections.

**COLLECTION, TEMPORARY STORAGE, AND TRANSPORTATION OF SOLID WASTE**

All solid waste facilities and equipment in Pickens County are planned, designed, and operated as an integral function of this Plan. All facilities and equipment must be selected to ensure maximum efficiency for operations, proper locations for use by citizens and transportation cost, safety, and the lowest possible purchase price. Pickens County is evaluating the effectiveness of its solid waste collection program and eight (8) drop-off centers and convenience centers.

**SOLID WASTE TRANSFER STATIONS**

One solid waste transfer station for Class Three waste is located within Pickens County. There are no transfer stations for Class Two waste in the county. Based on projected waste generation, the available Class One and Class Two landfill capacity in the county and the excess capacity of the county Class Three waste transfer station, Pickens County will not need any public or private solid waste transfer stations to fulfill the management requirements of the County for the next twenty (20) years.

**SOLID WASTE PROCESSING FACILITIES**

There currently are no solid waste processing facilities located within Pickens County other than the Pickens County Bailing Facility for recycle materials. Based on current disposal capacities, Pickens County will not need any public or private Solid Waste Processing capacity to fulfill the
management requirements of the County for at least twenty (20) years.

CLASS THREE LANDFILLS (MUNICIPAL, INDUSTRIAL, SLUDGE, INCINERATOR ASH)

Currently, no operating Class Three (Subtitle D MSW) Landfills are located within Pickens County. During FY14, of the 76,695 tons of Class Three waste generated in Pickens County, 5,770 tons was exported to out-of-state facilities, 38,680 tons was disposed of in Twin Chimneys Landfill in Greenville County, 16,445 tons was disposed of in the Upstate Regional Landfill in Union County, 7,900 tons was disposed of in the Palmetto Landfill in Spartanburg County, and 83 tons was disposed of in the Richland Landfill in Richland County. Currently, Pickens County collects and transports the majority of its Class Three waste to Twin Chimneys Landfill in Greenville County. Pickens County has sufficiently planned for the management of its Class Three waste such that no Class Three landfill capacity is necessary for the planning period. Furthermore, no public or private replacement Class Three Landfills, public or private expansions of Class Three Landfills, or new public or new private Class Three Landfills will be necessary to fulfill the County’s capacity requirements.

In March of 2016, the State of South Carolina amended its code of laws by adding section 58-27-255. The new law requires that Coal Combustion Residuals (aka; CCR or “coal ash”) resulting from the production of electricity to be disposed of only in a Class Three landfill. The disposal of CCR or “coal ash” is specifically prohibited in Pickens County since there are no current or planned Class Three Landfills operating in the County. The transfer of CCR or “coal ash” into or through the County is specifically prohibited. Temporary stockpiling of CCR or “coal ash” for “beneficial reuse” or recycling is specifically prohibited within the County.

CLASS TWO LANDFILLS (CONSTRUCTION, DEMOLITION, AND LAND-CLEARING DEBRIS AND INDUSTRIAL WASTE)

The Easley Class Two (C&D) Landfill, owned by the County, is the only Class Two Landfill currently operating in Pickens County. Ninety percent (15,512 tons) of the Class Two waste generated (17,166 tons) in Pickens County was disposed of in the county facility in FY14. Without further expansion, the Easley Landfill will likely exhaust its permitted capacity in 3.7 years. Pickens County will closely monitor the Class Two waste stream movement and plan for potential additional disposal and recycling options.

A private disposal company, MRR Pickens LLC entered into an agreement with Pickens County in 2007 to construct and operate a private Class Two Landfill located near Highway 93. SCDHEC issued Permit # LF2-00003 in 2008 for the construction of a Class Two Landfill with an annual capacity of 70,500 tons. Under the terms of SCDHEC Permit #LF2-00003 and the County’s Land Use Permit, the Highway 93 Class Two Landfill is only permitted to receive for disposal “Acceptable Wastes” explicitly listed in Appendix I of South Carolina Regulation 61-107.19. No other wastes are permitted for disposal within the County. Moreover, no public or private expansions of existing Class Two Landfills, or new public or private Class Two Landfills will be necessary to fulfill the County’s capacity requirements.
CLASS ONE LANDFILLS (LAND-CLEARING DEBRIS AND YARD TRASH)

Pickens County has two (2) Class One Landfills. This expected life of these private landfills is unknown. Only 567 tons of Class One waste was received at these private landfills during FY14. Through the management of land clearing debris at the Easley Class Two Landfill and yard trash in the solid waste incinerator operated at the Easley Landfill property, the County has sufficient capacity to manage this waste stream. Thus no public or private Class One Landfill capacity will be necessary.

SOLID WASTE INCINERATORS

Pickens County currently has one operating solid waste incinerator. Since adequate disposal capacity is available no public or private replacement or new public or private solid waste incinerators will be necessary to fulfill the capacity requirements of the County since adequate landfill disposal capacity is available.

COMPOSTING AND WOOD CHIPPING/SHREDDING FACILITIES

Two (2) active composting facilities are currently located in Pickens County. The County intends to continue the practice of recycling yard debris and land-clearing debris through mulching and/or composting. The County encourages the reuse of yard trash and land clearing debris by composting or wood chipping.

USED OIL COLLECTION AND PROCESSING FACILITIES

Used oil generated in Pickens County is currently collected at the County Convenience Centers (Table 4 on page 10) and several other locations around the County, and collected for biodiesel production or sent for energy recovery. No expansions or new permitted commercial Used Oil Collection and Processing Facilities will be necessary to fulfill the capacity requirements of the County.

WASTE TIRE HAULERS, COLLECTORS, PROCESSING FACILITIES AND DISPOSAL FACILITIES

Pickens County currently has one permitted Waste Tire Processing Facility. This facility and other processors outside the County should be sufficient to meet the needs of the County in the future. This facility may expand as necessary to provide additional waste tire management capacity. No new Waste Tire Collectors, Waste Tire Processing Facilities, or Waste Tire Disposal Facilities will be necessary to fulfill the capacity requirements of the County. The County intends to continue to collect waste tires to be shipped to waste tire recyclers for re-use.

RESEARCH, DEVELOPMENT, AND DEMONSTRATION (RD & D) PERMITS

RD&D projects will be unnecessary to meet the county's solid waste management requirements during the planning period to meet the goals of the County.
LAND APPLICATION OF SOLID WASTE PERMITS

Pickens County currently has no operating Land Application of Solid Waste Facilities. None will be needed to fulfill the solid waste management requirements of the County.

RECYCLING PROGRAMS

Due to the rural nature of the unincorporated areas of Pickens County, the County will continue to rely on drop-off centers as its primary means of collecting recyclables during the planning period. The County currently operates eight (8) convenience centers. As the population grows, and as funding is available, the number of convenience centers is likely to increase. Pickens County does have curbside recycling as an option for their franchise areas.

The County is responsible for the collection of recyclables and the marketing strategies for the sale of recyclables. The County Recycling Coordinator will continue to pursue recycling markets that offer the most stability and best rates for the materials collected by continuing to stay abreast of trends in markets and marketing strategies through contacts at the State and Federal government levels as well as professional societies such as the Carolinas Recycling Association. As the markets change and as stable cost-effective markets are developed for additional materials, it is possible that those materials may be added to the program.

Additional recycling would be desirable since the current disposal rate must be decreased in order to meet the goal of 3.5 pounds per person per day. However, the requirements of dealers and vendors must be considered and may restrict the ability to effectively market recyclables. Dealers may require separation or baling rather than loose or co-mingled recyclables. Another issue may be whether the dealer will pick up the items or if transportation will be the responsibility of the County.

The Recycling Coordinator is also responsible for public education, community outreach programs, and coordinating recycling projects. As funding allows in the future, the County will seek to expand its public education programs to make citizens more aware of the need to reduce waste and about the opportunities that exist for recycling.

SPECIAL WASTES

Pickens County will continue to handle special wastes in accordance with its existing procedures. The transfer of CCR or “coal ash” into or through the County is specifically prohibited. Temporary stockpiling of CCR or “coal ash” for ‘beneficial reuse” or recycling is specifically prohibited within the County.
HOUSEHOLD HAZARDOUS MATERIALS (HHM)

Pickens County does not anticipate implementing an HHM program at this time. HHM will continue to be handled as part of the Class Three stream.

IMPORT AND EXPORT OF WASTE

The County does allow the import of waste into the County. There are no controls over the export of waste to areas outside of the County. In FY2014, Pickens County exported 5,770 tons of Class Three waste to out of state. Export of waste will continue for the foreseeable future since the County has negotiated favorable terms with Greenville County for disposal of Class Three waste at the Twin Chimneys Landfill.

TREATMENT OF CONTAMINATED SOILS

Upon discovery of contaminated soils within the County, Pickens County will take necessary steps for removal and proper disposal or treatment of the soils in accordance with solid waste regulations. The County will not need an expanded or new soil treatment facility during the planning period.

STORM DEBRIS MANAGEMENT

Pickens County has a Storm Debris Management Plan to guide the County during major storm events. Due to the size of the document it is not included in this Plan.

V. GOALS, POLICIES, STRATEGIES, AND BARRIERS

REDUCTION

According to the South Carolina Solid Waste Management Annual Report for Fiscal Year 2014 the solid waste management and recycling goals as follows:

*The state’s goal is to recycle at least 40 percent of its MSW and reduce MSW disposal to 3.25 pounds (or less) per person per day (pppd) by 2020.*

For FY14 citizens of the County disposed of 2.79 pppd of waste. Even though Pickens County far exceeded the State reduction goal the County will continue to work to improve by working with residents, businesses and organizations to further reduce the amount of defined MSW generated for disposal. A continued education effort in source reduction is anticipated to decrease the amount of waste transported for disposal in landfills. Pickens County has already taken positive steps toward source reduction with the implementation of a voluntary recycling program including waste tire recycling and used oil recycling. The public must continue to be informed of the benefits of recycling and the various ways in which residents can help in this endeavor. By separating out a greater percentage of recyclable aluminum, paper, cardboard, and plastic, Pickens County’s waste
stream may be further reduced.

RECYCLING

For Fiscal Year 2014 the County recycled thirty-four (34%) percent of the MSW generated. In order to meet the state goal of 40 percent, Pickens County will continue to promote Public education to inform residents of recycling programs being implemented within Pickens County and the best way for each resident to participate. An informed public is more likely to recycle than an uneducated public. Pickens County will place a larger emphasis on recycling with commercial businesses, retailers, etc. in an effort to increase the County’s overall recycling rate. Pickens County will continue to develop and distribute literature that focuses on recycling and its importance to the environment.

EDUCATIONAL PROGRAMS

All educational efforts will target the residents of Pickens County with an emphasis on the collection service area residents and drop-off center customers. The programs will be evaluated and revised according to the change in resident’s behavior as indicated by the MSW stream reduction and increase in the collection of recyclable material.

The South Carolina Office of Solid Waste Reduction and Recycling was created by the Solid Waste Policy and Management Act of 1991 and is part of the Division of Mining and Solid Waste Management. The Office of Reduction and Recycling, in accordance with the Act of 1991, provides educational, technical, and grant assistance to local governments, schools, colleges, and universities and the public regarding solid waste management issues. Pickens County has and will continue to work with the Office of Reduction and Recycling to obtain assistance with their public education campaign and grant preparation.

TECHNICAL ASSISTANCE

The contact for information concerning MSW management, recycling, and source reduction in the state is as follows:

Department of Health and Environmental Control
Office of Solid ·Waste Reduction and Recycling
2600 Bull Street Columbia, SC 29201 (803) 896-4000
1-800-SOUSEIT (1-800-768-7348)
VI. REVISION AND CONSISTENCY WITH WASTE MANAGEMENT PLANS

ANNUAL PROGRESS REPORTS

Section 44-96-60 of the Act requires SCDHEC to submit, to the Governor and General Assembly, a comprehensive report on solid waste management in South Carolina, by March 15 of each calendar year. Therefore, SCDHEC requires each county or region to submit an Annual Progress Report to the Department by October 1 of each year. The Annual Progress Report shall contain information as may be requested by the Department, but must contain, at a minimum, the following:

- Any revisions to the Solid Waste Management Plan previously submitted by the county;
- The amount, type, and percentage of materials that were recycled, if any, during the previous year;
- The percentage of the population participating in various types of source separation, recovery, or recycling activities during the previous year; and
- A description of the source separation, recovery or recycling activities or all of the above activities attempted, if any, their success rates, the reasons for their success or failure, and a description of such activities, which are ongoing.

REVISIONS TO THE PICKENS COUNTY SOLID WASTE MANAGEMENT PLAN

The Pickens County Solid Waste Management Plan will be reviewed annually and revised as needed to ensure consistency with the South Carolina Solid Waste Management Plan and various legal precedents. Section 44-96 80 (£) of the Act of 1991 states that all solid waste management plans shall be consistent with the South Carolina Solid Waste Management Plan, provisions of state law and regulations promulgated by the Department for the protection of public health and safety and the protection of the environment. Reviews and revisions will be conducted by the Pickens County Administrator and approved by the County Council. Revisions to the Solid Waste Management Plan will be conducted to keep this document as an up-to-date planning and communication tool so that the general public is kept abreast of solid waste issues affecting Pickens County. All proposed revisions to the plan will be public noticed providing opportunity for public input. Revisions to this Plan must be submitted by the Director of Public Works to the County Administrator and approved by the Pickens County Council. The effective date of the revisions to the Plan will be the date the suggested revisions are approved by resolution of the Pickens County Council. Any revisions made to the Pickens County Solid Waste Management Plan shall be submitted to SCDHEC. The Department may accept revisions to the Plan only from the Pickens County Administrator.
DETERMINING CONSISTENCY WITH COUNTY SOLID WASTE MANAGEMENT PLAN

A permit applicant must submit a request for a consistency determination through SCDHEC. All correspondence regarding consistency shall be forwarded to the Pickens County Administrator. Only the Pickens County Administrator may comment to SCDHEC regarding all consistency correspondence.
VII. FULL COST DISCLOSURE

Pickens County funds all solid waste and recycling activities through tipping fees, residential and non-residential user fees, and State Grant Funds.

In accordance with the Act of 1991, Pickens County shall annually determine the full cost for solid waste management services. Such figures will help to determine the annual solid waste/recycling fee. The County shall publish a notice by October 1, in a newspaper of general circulation, setting forth the full cost to all users, on an individual basis, of its solid waste management services for the previous Fiscal Year. Table 6 below gives the full cost disclosure based on the Fiscal Year 2014 Budget.
